About the Company

CRYPTO CURRENCY

Cryptocurrency was Founded in 2009 by a programmer (or, possibly, a group of programmers) under the Pseudonym Satoshi Nakamoto, bitcoin ushered in a new age of blockchain technology and decentralized digital currencies. Satoshi's whitepaper outlining bitcoin also describes the concept of blockchain technology for the first time, saying that "the network timestamps transactions by hashing them into an ongoing chain of hash-based proof-of-work, forming a record that cannot be changed without redoing the proof-of-work.

Although the cryptocurrency market is relatively new, it has experienced significant volatility due to huge amounts of short-term speculative interest. For example, between October 2017 and October 2018, the price of bitcoin rose as high as \$19,378 and fell to lows of \$5851. Other cryptocurrencies have been comparatively more stable, but new technologies are often likely to attract speculative interest.

About the Company

WE SWITCHED TO CRYPTOCURRENCY MINING AND TRADING

The cryptocurrency market is usually available to trade 24 hours a day, seven days a week, because there is no centralised governance of the market. Cryptocurrency transactions take place directly between individuals on cryptocurrency exchanges all over the world. However, there may be periods of downtime when the market is adjusting to infrastructural updates or 'forks'.

Liquidity is the measure of how quickly and easily a cryptocurrency can be converted into cash without impacting the market price. Liquidity is important because it brings about better pricing, faster transaction times, and increased accuracy for technical analysis.

In general, the cryptocurrency market is considered illiquid because the transactions are dispersed across multiple exchanges, which means that comparatively small trades can have a huge impact on market prices. This is part of the reason cryptocurrency markets are so volatile.

We continually trade to find a dependable income stream among the various markets. A cutting-edge, user-friendly trading platform enabling traders of all skill levels to conduct online transactions in a wide range of financial products which covers Bitcoin, Litecoin, Ethereum, and PerfectMoney. Our three investment programmes offer a consistent revenue stream to our clients.

● FOREX TRADING AND CRYPTOCURRENCY ●

A digital currency, or cryptocurrency, is an alternative payment method developed utilising encryption methods. Because of the usage of encryption technology, cryptocurrencies are functional both as a medium of exchange and an electronic bookkeeping system. You need a wallet to use cryptocurrency. A global decentralised or over-the-counter market for the trading of currencies is the foreign exchange market. For every currency, exchange rates are set by this market. It covers every facet of purchasing, selling, and exchanging currency at the going rate.

Some people have started to think that trading in forex and cryptocurrencies are essentially the same thing over time. Others, though, have come to think that there is a significant difference between the two.

A premier trading platform which offers a wide range of services on a number of underlying assets.

Trading

● IS THE MARKET FOR CRYPTO STILL GOOD? ●

Cryptocurrency investment may be a smart move if you're ready to accept that it's a high risk wager with a chance of success but also that you run the very real risk of losing all of your money.

Prices of cryptocurrencies will plummet in 2022 due to a global cryptocurrency price crash. have decreased, including the price of Bitcoin. Insofar as it's accurate, The Wealthrise-capital has all the hazards related to cryptocurrencies covered. A team of trading professionals for both forex and cryptocurrencies has been assembled to research and evaluate and stop any type of loss and damage to the market. Trading does have dangers, to some extent. Trading with the appropriate company removes any worries.

● HOW COME CRYPTOCURRENCIES MATTER? ●

Due to its decentralised nature, blockchain-based cryptocurrencies allow for peer-to-peer financial transactions and contract signing platforms. The current financial system may be overturned, and finance may become more democratic. Over the past few years, the size of the cryptocurrency market has drastically risen.

Ten years, as a result of fresh innovations and a market value of almost \$948 billion. Other significant cryptocurrencies besides Bitcoin are Ethereum (ETH), Tether (USDT), Dollar Coin (USDC), Coin Binance (BNB), USD Binance (BUSD), XRP, Dogecoin (DOGE), Cardano (ADA), Polkadot (DOT).

A premier trading platform which offers a wide range of services on a number of underlying assets.

Trading

● ANALYZING CRYPTO CHART ●

Most cryptocurrency price charts use candlesticks as their primary price indicator. Each candlestick stands for the cost. A green candle on the majority of cryptocurrency charts denotes a bullish trend or an increase in price, while a red candle signifies a bearish movement or a drop in price.

● A COMPARISON OF CRYPTO AND FOREX TRADING ●

Unlike cryptocurrencies, you can exit forex trades with ease. In the currency market, it is simple to exit a trade. Since 2019, the market price on a currency market has risen dramatically over time. You can easily withdraw or exit a trade when the price you arrive at during trading is closer to the one you see on the screen.

However, once a cryptocurrency depreciates, it may be difficult for traders to exit the position, especially for the majority of coins, excluding Bitcoin and Ethereum.

The market for cryptocurrencies is available for trade and investing. To invest is to make a currency purchase, with the intention of keeping it for a long time in the hope that its value would increase.

A premier trading platform which offers a wide range of services on a number of underlying assets.

Trading

● TRADERS OPTIONS ●

Some investors are planning to trade for Bitcoin rather than buy it. Some investors don't plan to purchase Bitcoin but instead trade for the long term, using the tried-and-true strategy of "buy low, sell high."

Cryptocurrencies are limited in supply since their circulation is managed by the industry's miners. It's also important to bring out the fact that crypto trading is accompanied by high market volatility. Currency prices fluctuate often on the market due to a number of variables, some of which are beyond of anyone's control. Overall, the cryptocurrency sector is growing, with Bitcoin at the forefront.

● EXCHANGE LANDSCAPE ●

It's incredibly fun and fascinating to trade currencies. There are numerous opportunities built into it. Truthfully, even with this, it is highly improbable due to the numerous risk factors you could experience.

As a novice, you may experience extreme anxiety when considering forex trading while also experiencing extreme joy. Bewildered and unsure of whether to be delighted or concerned about whether you will make a profit or a loss. One must therefore comprehend the fundamentals. A thorough understanding of how the forex market operates.

A premier trading platform which offers a wide range of services on a number of underlying assets.

Trading

Below are a few tips on how to understand the forex landscape:

- **Start Small** The mistake many people make is that they put in all their capital or money into trading and might end up losing all. The wise way is to start as a beginner is with a little amount of money. This is very advisable especially for those who do not have experiences in forex trading. It's normal to make money on some trades and lose it to others but one needs to be pretty much smart as a trader. Remove the mindset of a luck game from your mind and focus on the positivity and active research of the forex market.
- **Money Management** The secret to effective FX trading is sound money management. Traders and investors have both done this and practice it. When you prioritize generating more revenue and reinvesting it to grow your business money makes you affluent. But if you continue to spend money from profits on the lowest priority, you lose. Another error you should avoid is setting improbable take-profit and stop-loss settings. Punishment is crucial whether circumstances are favorable or unfavorable since it prevents you from pursuing victories and losses.

A premier trading platform which offers a wide range of services on a number of underlying assets.

Trading

- **Training** It's advisable to receive formal training from trade professionals, especially if you're a beginner. Our firm, The Wealthrise-capital, is made up of skilled traders that are knowledgeable about the ins and outs of forex trading and trading as a whole. Allow them to instruct you on how to correctly foresee the future and comprehend how the market functions.
- **Consistency** It is true that failure stories may be discovered anywhere where there is a success story. Rich minds are consistent thinkers. Failure is the first step toward success. Always keep in mind that if you feel like you haven't had enough or the greatest isn't yet arrived. The secret is to be consistent, additional practise with practise accounts.
- **Trade Analysis** You must learn to routinely assess your deals as a beginner. Even when you get more expertise in the forex market, adhere to it as a rule and make it a habit. When you comprehend trade analysis, it aids in your comprehension of the currency market and what to accomplish and what to stay away from when trading. You gain a thorough understanding of your worldview by gaining insightful knowledge from trade analysis differently and gradually enhance trading performance.

Let's Meet Our CEO

POWELL JACKSON

Powell Jackson is an investor with twenty-five years of expertise in forex and cryptocurrency trading. Since 2000, he has relied on trading for a living. In order to prepare for his own sell side forex trading, he has also spent the last two years studying math and statistics. He also investing in the crypto from a long time, so he has a good knowledge how the crypto market works. During these days of investment, he has earned a healthy amount of profit, and understand the tactics how to invest, when to invest and how much to invest in cryptocurrency. He also worked as a cryptocurrency trader in some popular companies and now he is going to be the CEO of the The Wealthrise-capital. He now attempts to operate profitably without making any personal sacrifices because he is so content with his newly discovered trade based way of life. The forex market offers a variety of ways to manage risk, but it is also highly volatile and fraught with emotion. He makes a strong argument for why he stopped trading independently and switched to being an expert given his experience to the new investors of crypto platform.
